

What you get.

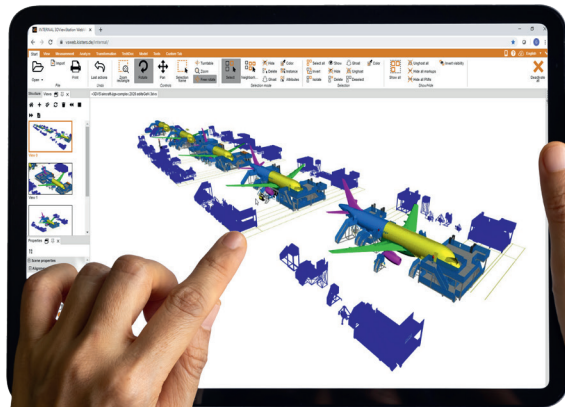

Your Benefits.

The 3DViewStation WebViewer is a highly performant, browser-based, CAD Viewer. It allows you to access your 3D CAD data, 2D CAD drawings and non-CAD data any time, anywhere, with any HTML5-capable desktop PC, notebook, tablet PC or smartphone running Windows, Linux, iOS or Android. A web browser is all you need – there is no client installation necessary ("zero install, zero admin"). The server runs in the Cloud or on-premises – it's your decision.

In addition, the 3DViewStation WebViewer can be easily integrated into a product configuration solution, service lifecycle management application, spare part portal, cloud solution or PLM client.

With KISTERS' innovative intellectual property (IP) protection, users can now distribute complex CAD data, safely and at lightning speed. WebViewer will never transmit any geometry to your web device plus, WebViewer offers additional IP protection functionalities.

➤ VIEW ANY TIME, ANYWHERE

For Tablets, Smartphones, PCs – and on all operating systems. Have access to your data wherever you are.

➤ INTEGRATE SEAMLESSLY

Start your WebViewer session from within Teamcenter, Aras, 3DEXperience and more.

➤ LARGE MODEL VISUALIZATION

3DViewStation works at a high performance level, even at narrow bandwidths, on low-cost devices.

➤ ULTRA FAST LOAD TIMES

Works with even the largest of your assemblies – instantly load millions of parts in seconds.

➤ EASY-TO USE

Little to no training required and the intuitive UI can be adapted to your specific requirements.

➤ ALL-IN-ONE SOLUTION

Analyze your models with more than 180 functions available (sectioning, measurement and much more).

➤ MANY FILE FORMATS – PLUS MULTI-CAD

View all your daily CAD models and documents – we support more than 70 different file formats.

➤ ZERO INSTALLATION

With our HTML5 web-based viewer you'll have zero installation, zero administration and zero footprint.

If you would like more information or a demo license to test 3DViewStation WebViewer on your own, please contact us at:

Fast Multi-CAD Visualization

for Desktop, Web, Mobile and VR.

The KISTERS 3DViewStation combines the best in 3D visualization technology, web-based collaboration, VR technology plus it is revolutionizing speed and rich functionality – with more than 180 functions at your fingertips. Speed up the process chain in your company, from engineering and design to sales and procurement.

3DViewStation is a powerful and robust 2D/3D CAD viewer for all users in need of high performance and rich functionality, no matter what device they are using. It is available as a **Desktop** application, for your daily work, as a server based **WebViewer/ Mobile** version, to view your data anywhere, as a **VR-Edition** for an immersive 3D model experience, and as an **Embedded Viewer** in external applications, ranging from PLM to product configurators. All products share an identical user interface and set of functionality.

Load, open, and interact with any size model without waiting for rendering or latency. Use analysis functions such as: sectioning, measurements, smart dimensioning, exploded views and markup capabilities plus other investigative functions to gain insight from your product data. Improve communication, decision making and reduce errors through product data visibility.

Intuitive handling is one of the basic principles of 3DViewStation. We have done our best to ensure that your work with 3DViewStation is

a real pleasure. A low training requirement and exceptional ease-of-use drives a high user adoption rate. If you're looking for an intuitive, easy to use application to load 3D CAD data quickly – you have found it.

Our solutions integrate into various solutions, as PLM systems (e.g. 3DExperience,

TeamCenter, ActiveWorkspace, Cim Database, Aras Innovator), product configuration, online collaboration, plant layouting, after sales solutions incl. MRO / SLMS, preventive and predictive maintenance solutions and spare part catalogs, costing, quality assurance and long term archiving solutions, and also Human Machine Interfaces (HMI).
